DETAILED ACTION

Response to Amendment

Claims 1-17 are pending.

The 35 USC 112 second paragraph rejection of claims 1-4 has been withdrawn based on applicant's amendment filed on January 24, 2005.

The 35 USC 102 rejection of claims 5,6,11,12,17 has been withdrawn based on applicant's amendment filed on January 24, 2005.

Claims 7-10,13-16 had been previously indicated as allowable subject in non-final office action mailed on August 16, 2004.

Allowable Subject Matter

Claims 1-17 are allowed.

The following is an examiner's statement of reasons for allowance:

None of the cited prior arts alone or in combination discloses the claimed laser of independent claims 1,5,11 and 17.

Regarding claims 1-4,

None of the cited references alone or in combination discloses or suggest the automatic power control system of independent claim 1 with the recited structural combination of a bias current determination unit with a first difference determination unit, a first integrator and a modulation current determination unit with a nonlinear processing block, a second difference determination unit and a second integrator, where the structural combination provide simultaneously adjustment of an output power and an extinction ration of the laser diode.

Regarding claims 5-10,

None of the cited references alone or in combination discloses or suggest the method of independent claim 5 with the recited steps for maintaining a laser output signal about a reference average output power and about a reference extinction ratio in particular having the steps of receiving a current measured output power value and adjusting for nonlinear estimation of the current measured output power value.

Regarding claims 11-16,

None of the cited references alone or in combination discloses or suggest the laser of independent claim 11 with the recited limitations in particular having means for receiving a current measured output power value and means for adjusting for nonlinear estimation of the current measured output power value, thereby maintaining a laser output signal about a reference average output power and about a reference extinction ratio.

Regarding claim 17,

None of the cited references alone or in combination discloses or suggest the method of independent claim 17 with the recited steps for maintaining a laser output signal about a reference average output power and about a reference extinction ratio in particular having the steps of receiving a current measured output power value and adjusting for nonlinear estimation of the current measured output power value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
